**BUREAU OF EMERGENCY MEDICAL SERVICES AND TRAUMA SYSTEM**

**COUNTY TRAUMA REPORTS:**  
**GREENLEE COUNTY**  
**ASTR 2012**

**Prepared by:**  
**Maureen Brophy, MPH**  
**Vatsal Chikani, MPH**  
**Rogelio Martinez, MPH**

**Data and Quality Assurance**

**Purpose:**

The purpose of this report is to describe the incidence of trauma in your county using the Arizona State Trauma Registry (ASTR). This information can develop and strengthen injury prevention programs at the county level.

**Methods:**

In 2012, the Arizona State Trauma Registry (ASTR) received data from 31 state-designated trauma centers. Three additional healthcare institutions participated in the registry but were not designated. The Arizona trauma system had eight Level I trauma centers - six were located in the central county of Maricopa with 60 percent of the state's population; the remaining two Level I trauma centers were located in the northern-most county of Coconino and the southern county of Pima. For the 2012 reporting year, there were twenty designated Level IV and three Level III trauma centers dispersed primarily in the rural areas of the state. There are a total of 32,602 records in the ASTR for 2012.

**Limitations:**

Data is limited to participating hospitals in the state. Information on patients that were treated at out of state and non-participating hospitals will be missed. Injuries included in this registry are those which fit the ASTR inclusion criteria (Appendix 1). As such, injuries reported are reflective of severe injuries, and may not be a complete picture of injury in your county.

**Geo-Population:**

Arizona is 400 miles long and 310 miles wide for a total area of 114,006 square miles. The topography of the state is 364 square miles of water and a blend of deserts, mountains, and plateaus. Arizona shares contiguous borders with the states of California, Colorado, Nevada, New Mexico, and Utah. Internationally, the Mexican states of Sonora, Chihuahua, and Baja California Norte share a border with Arizona.

The total reported population in 2012 was 6,498,570; this was up from the 2011 reported number of 6,438,178 residents.<sup>1</sup> In 2012, 84.2 percent of the population lived in urban counties (Maricopa, Pima, Pinal, and Yuma). The remaining counties (Apache, Cochise, Coconino, Gila, Graham, Greenlee, La Paz, Mohave, Navajo, Santa Cruz, and Yavapai) were home to 15.8 percent of the population.

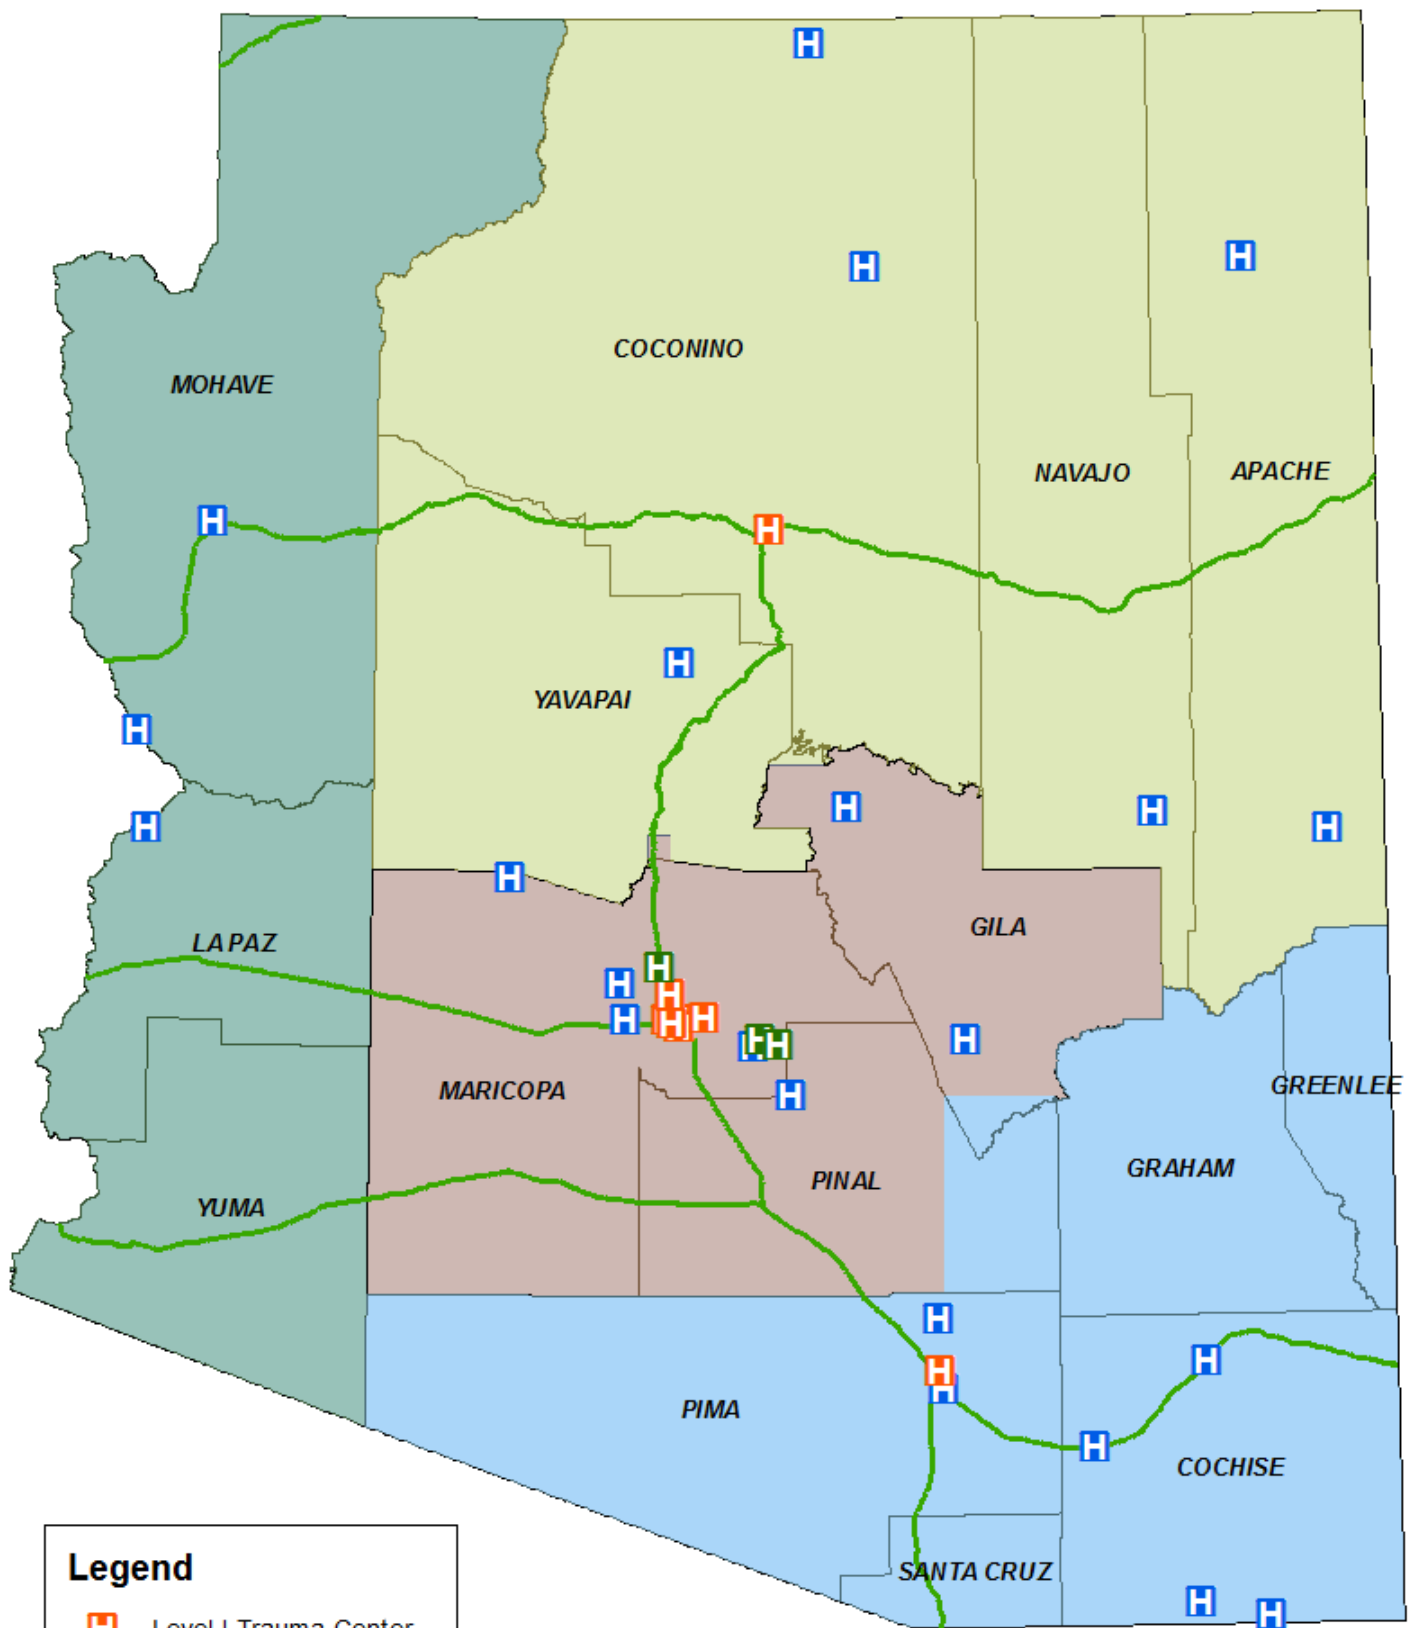

Additionally, Arizona has within its borders twenty-two (22) federally recognized American Indian tribes, comprising a 2012 collective population of 305,029.

Other	-	-	552	1.7%	-
Total	6,498,570	100%	32,602	97.5%	502
Missing = 803					

Statewide, there were 32,602 traumatic injuries seen at state designated trauma centers– a rate of 502 per 100,000 Arizona residents.

Greenlee County makes up about 0.1 percent of the total population of Arizona. Injuries occurring in the county make up about 0.1 percent of the trauma cases from state designated trauma centers. The county-specific trauma rate, 477 per 100,000 county residents, is lower than the state average (Figure 3).

**FIGURE 3: County-specific trauma rates per 100,000 residents**

FIGURE 4: Frequency and rate of trauma by age, race/ethnicity, and gender in Greenlee County

Group		Count	Percent	Rate per 100,000
Age	<=14	2	4.9%	101
	>14	39	95.1%	589
Gender	Female	19	46.3%	461
	Male	22	53.7%	491
Race/Ethnicity	Hispanic	18	43.9%	441
	Non-Hispanic	21	51.2%	504
Total		41	100.0%	477

Due to the low trauma frequencies in some age groups, categories have been combined for analysis.

The trauma rate in people older than 14 years of age in Greenlee County is lower as compared to the rest of the state (Figure 4).

FIGURE 5: Trauma rate per 100,000 residents by age

**FIGURE 6: Trauma rate per 100,000 residents by gender**

Males in Greenlee County have higher trauma rates than their counterparts in other counties (Figure 6).

The trauma rate for people of non-Hispanic race/ethnicities is higher than for those of Hispanic race/ethnicities in Greenlee County (Figure 7).

**FIGURE 7: Trauma rate per 100,000 residents by race/ethnicity**

Due to the low trauma frequencies in non-Hispanic race/ethnicities, those categories have been combined for analysis.

Figure 9 shows the top causes of traumatic injury in Greenlee County, as compared with other counties (rates per 100,000).

**FIGURE 8: Frequency of top causes of trauma in Greenlee County**

Cause	Count	Percent
Motor Vehicle Traffic	12	29.3%
Falls	11	26.83%
Transport, other	5	12.20%
Struck by/Against	4	9.76%
Unspecified	2	4.88%
Other Specified	2	4.88%

**FIGURE 9: Top causes of trauma, rates per 100,000 residents**

FIGURE 10: Intention of trauma, rate per 100,000 residents

The rates of all types of trauma intent in Greenlee County are lower than in other Arizona counties (Figure 10).

Documented alcohol and drug use was present in 14.3% and 5.7% of traumatic injuries in Greenlee County, respectively (Figure 11).

Alcohol and drug use is defined as any indication of use through testing or self-report, regardless of level of impairment.

FIGURE 11: Substance use in traumatic injuries in Greenlee County

FIGURE 12: Frequency of substance use in traumatic injuries in Greenlee County

Substance Use		Frequency	Percent
Alcohol	No	30	73.2%
	Yes	10	24.4%
	Missing	1	2.4%
Alcohol	Total	41	100%
	No	36	87.8%
	Yes	4	9.8%

<b>Other Counties</b>	4590	22923	4940	108

**FIGURE 15: Golden hour by transport type**

The term “golden hour” refers to the hour immediately following traumatic injury. Theoretically, the chance of survival is highest when medical treatment to prevent irreversible internal damage is obtained within this time period.

Due to the large amount of missing data on golden hour, results on the proportion of patients arriving at the hospital within one hour are not conclusive.

**FIGURE 16: Count of golden hour by transport type to trauma center**

Golden Hour	Air Ambulance		Ground Ambulance		Total	
	Count	Percent	Count	Percent	Count	Percent
≤ 1 Hour	0	0.0%	0	0.0%	0	0.0%
> 1 Hour	3	8.8%	0	0.0%	3	7.9%

Primary Payer	Frequency	Percent
Private-commercial	21	51.2%
Self pay	10	24.4%
AHCCCS/Medicaid	*	*
Medicare	*	*
Other Government	*	*

Private-commercial is the primary payment source for trauma-related hospital visits in Greenlee County (Figures 17 & 18).

The median charge in Greenlee County in 2012 was \$26,702 (Figure 19).

\* 5 or fewer observations

**FIGURE 19: Charges & reimbursement by primary payer in Greenlee County**

Primary Payer	Total Charges	Median Charges	Total Reimbursement
Private-commercial	\$958,305	\$32,164	\$382,481
Self pay	\$209,248	\$20,714	\$5,985
